

Dear FCC (Federal Communications Commision),

This is Fred McLellan, I would like to support this CSD's webpage URL: <http://www.c-s-d.org/Default.aspx?tabid=243> show that VRS (Video Relay Service) to require to follow FCC's rule or law to follow for VRS company such as Sorenson must use interoperability to flexible for Deaf and H-O-H (hard-of-hearing) able to use any interpreter relay service such as Hamilton, Sprint, Sorenson, Gallaudet, etc. I dont like to limit one interpreter service through VRS at my home. I would like to equally accessible by simple setting up my VRS equipment like one system. I am 100% agree with CSD to seek to opporunity equally with all other VRS companies. VRS companies need to follow FCC's rule. Please look carefully about it. Thank you for this VRS issue from CSD, Fred McLellan, eagle74@aaahawk.com
